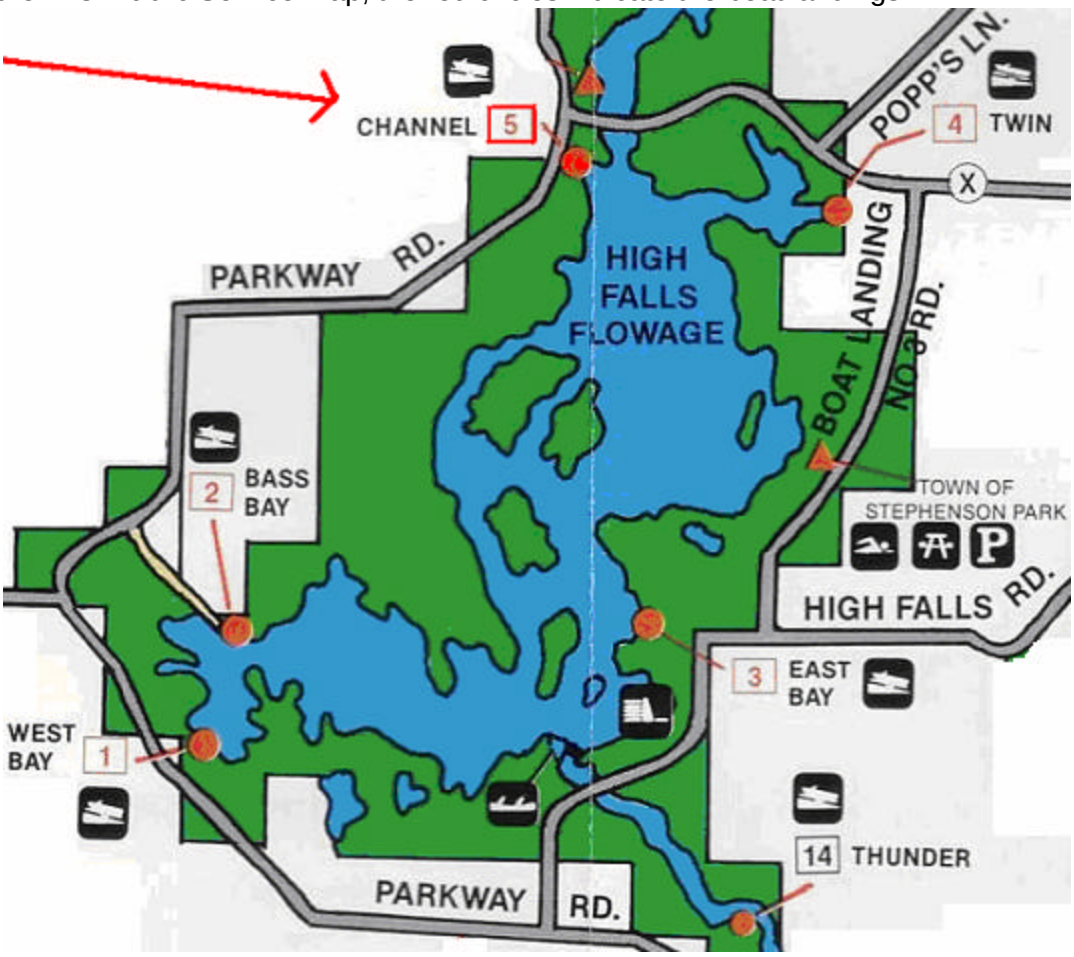
High Falls Flowage on the Peshtigo River
Boat Landing #05 - Channel

This is now part of the Peshtigo River Forest, formerly Wis. Public Service land. The High Falls Flowage is 1,700 acres in size. Maximum depth is 54 feet. This is a popular fishing area, and has heavy powered boat traffic in the summer. *(Note that the Boat Landings were numbered in sequence when they were built, and are not in sequence along the road.)* The boat landings are indicated by a small rectangular brown sign with the wording "boat landing" and an arrow.

We will put in at Boat Landing #05 Channel, which is accessed via Parkway Road.

- From county C, drive south on Parkway Road, driving past County X. It is immediately after you pass county X.
- From county W, drive north on Parkway Road. It is immediately before county X.
- From the east you could follow county X west until it meets Parkway Road and then turn left. It is immediately after you get onto Parkway Road.

You can paddle wherever you wish. The boat landing is easy to return to because it is immediately to the south of the county X bridge. There are 7 boat landings on this flowage.

Map of Area:


I offer the Wis. Public Service map; the red circles indicate the boat landings.
